Quantum Academy™
get ready for the world

Quantum Academy . . . for College, Career, and Life Success

Incoming high school seniors and incoming/current college students develop:

• Confidence and intrinsic motivation
• Time management skills
• Powerful study habits
• A personal growth plan
Prepare for Academic Success

College demands are certainly different from high school. Students may experience crowded lecture halls, unstructured schedules, and courses requiring hours of attention, study, and homework. The pace is fast and a typical day, if there is such a thing, can include classes, library time, friends, work, and maybe even a workout.

Seven days at Quantum Academy helps students succeed by providing the learning and life skills necessary to handle the challenges of college life. Students learn to manage their independence—personal and academic—and take full advantage of the exciting opportunities of their college years. Bottom line—Quantum Academy helps students enjoy an exceptional college experience.

“I met some incredible people who pushed me to a level I never thought existed in me. If you want to learn how to succeed in life, this is the place to be!”

—Craig McKenna, Quantum Academy graduate

Benefits

We help students sharpen their skills in several key academic and personal areas that are critical to success in college, other post-secondary training, jobs, and life. We address these areas in the context of real-world situations and expectations.

Key academic topics:

• Efficient study habits and learning techniques
• Preparation and delivery of presentations
• Creative thinking and problem solving
• Improved reading speed and comprehension
• Interactive leadership skills
• Working and communicating effectively in team environments

Key personal topics:

• Building on personal strengths and values
• Ownership of choices and outcomes
• Effective time management for increased productivity
• Meaningful and realistic short- and long-term goal setting
College & Career Ready

High schools, colleges, and other post-secondary training focus on teaching young adults content and technical skills, but often fall short in preparing them for what is foremost for employers—skills such as leadership, communication, and adaptability. The combination of accelerated learning techniques along with the development of sought-after life skills is what makes Quantum Academy so unique and valuable.

Quantum Academy facilitators and team mentors coach students on how to responsibly manage their time, set goals, develop action plans, and become more independent. Our dynamic, info-packed seven-day program empowers students with a new mindset and a strong sense of responsibility and ownership. Most importantly, they’ll realize just how much control they have over their future and their infinite potential to achieve.

In addition to preparing students for their next academic step, Quantum Academy also readies them for their work career and their transition into adult life. We not only tell students to “Get ready for the real world,” we teach them how, in a way that cannot and does not occur in schools.

“Quantum Academy has had a major influence in my life. I wanted to thank you for creating the program that enabled me to understand myself and my goals and become the person I am today.”

—Jeremy Morrison, Quantum Academy graduate
FAQ

Who developed Quantum Academy?
Quantum Academy is a program of SuperCamp and Quantum Learning Network (QLN), a global leader in student achievement. In our 38th year, we've grown into an international organization with 80,000 graduates. Through our Quantum Learning Education programs we've trained 70,000 teachers who have impacted more than 10 million students worldwide.

Who attends Quantum Academy programs?
Incoming high school seniors and incoming and current college students up to age 20 can attend Quantum Academy. Some participants in Quantum Academy may have taken a year or more off between high school and their post-secondary education. While many of our students are in or planning to enter a four-year college program, others may be targeting junior college or specialized training for a particular skill or career.

How would you describe Quantum Academy in relation to other college prep and college summer courses?
We combine the most effective methodologies for personal growth, accelerating learning, creating healthy relationships, building confidence, and developing one's authentic self.

What's a typical day like at Quantum Academy?
It's action packed. There are morning, afternoon, evening, and closing sessions interspersed around breakfast, lunch and dinner. Students can take advantage of 90 minutes of unstructured time after lunch for team or individual activities before the afternoon session.

Where and when will Quantum Academy be held in 2020?
Quantum Academy will run July 13-19 at Cal State Long Beach, Long Beach, CA.

How do you get results in 7 days?
Using brain science, we help students master strategies that support optimal learning. We also create a dynamic and supportive learning environment, which builds rapport among students, confidence, and self-motivation, all of which contribute to their success at Quantum Academy.

What is the Mentor Track?
Mentor Track, or M-Track, is designed for students who have successfully completed one year of Quantum Academy and want to take their leadership to the next level by mentoring others to excel in discovering and creating their best self.

If you could describe Quantum Academy in 10 words or less, what would you say?
Joyful learning and personal growth in a collaborative, energetic atmosphere.
